

6 Courses

Introduction to Big Data

Big Data Modeling and Management Systems

Big Data Integration and Processing

Machine Learning With Big Data

Graph Analytics for Big Data

Big Data - Capstone Project

UC San Diego

07/12/2020

RAHUL

has successfully completed the online, non-credit Specialization

Big Data

You will gain an understanding of what insights big data can provide through hands-on experience with the tools and systems used by big data scientists and engineers. By following along with provided code, you will experience how one can perform predictive modeling and leverage graph analytics to model problems. This specialization will prepare you to ask the right questions about data, communicate effectively with data scientists, and do basic exploration of large, complex datasets. In the final Capstone Project, developed in partnership with data software company Splunk, you'll apply the skills you learned to do basic analyses of big data.

A stylized graphic featuring two signatures. The top signature is "Ilkay Altintas" and the bottom signature is "Amarnath Gupta". Both signatures are written in a cursive, handwritten style.

Ilkay Altintas, Chief Data Science Officer
Amarnath Gupta,
Research Scientist
San Diego
Supercomputer Center

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
